Engines: 3

Helicopters: 1

Water Tender: 0

Structure Assessment Group

Bridger Foothills Fire started on an extremely dry and windy Friday prior to Labor Day. Initial attack resources responded in force, but given weather and fuel conditions the fire quickly spread. A frontal passage Saturday, September 5 pushed the fire to over 7,000 acres. The fire has shown minimal growth in recent days & suppression repair continues.

BRIDGER FOOTHILLS FIRE

Incident Commander Bob Culbreth, IC(T) Caleb Schreiber

CURRENT STATUS

Assessment and protection of fire-sensitive archaeological sites is currently ongoing. Activities that disturb the ground around known archaeological and cultural sites is being avoided if possible. Firefighters continue to patrol and respond to smoke reports in the interior of the fire. Structure assessments will continue today. Containment remains at 83%, and acreage remains at 8,224. Line improvement is occurring on the North perimeter of the fire, as full suppression remains an objective of the fire.

WEATHER / FIRE BEHAVIOR

As a cold front approaches today, winds could gust up to 20 mph. Temperatures will reach 80 degrees and humidity will remain low during the day. Overnight recovery of conditions continues to be unsubstantial, with a warming and drying trend persisting throughout the week. Fire behavior remains low, but large fuels continue to smolder and creeping persists through duff and litter.

CLOSURES

The Forest has updated the area closure. The new closure area includes roads and trails within National Forest System lands south of the Bridger Bowl Ski Area and east of the Bridger Ridge Trail #513, including Pine Creek Trail #538. Popular trails such as Sypes, Middle Cottonwood, Truman Gulch, Bridger Ridge Trail and access to the "M" are now open for recreational use. Please use extreme caution when entering areas within the burn zone and continue to respect the fire closure boundary. Bridger Canyon Road is open to the public. Travelers should SLOW DOWN and watch for fire traffic.

SAFETY MESSAGE

Recreating in burn zones can be dangerous. Watch out for hazards such as falling trees, loosened soil, burned-out holes in the ground and loose boulders and logs.
